

JAKE'S CUISINE

FINE FOOD FOR THE DOGS YOU LOVE

Hello kind friends,

We have a common bond; we love our pets,
it's as simple as that.

EXCITING NEWS

We have changed packaging and your Jake's Cuisine now comes in a totally compostable, biodegradable container made from refined corn. It will fully biodegrade in your compost bin in less than two months (one does have a compost bin, doesn't one).

BENEFICIAL INGREDIENTS

We would like to share information with you regarding some of the beneficial ingredients that make up Jake's Cuisine. Organic Quinoa (pronounced keenwa, as if you didn't know) has long been considered the super grain ancient food for today, Why? Well, quinoa is high in fiber, like most grains, but also contains all eight amino acids and is an excellent source of iron.

If you are feeding your pet Jake's Cuisine, you are treating them to Organic Ground Flaxseeds. This ingredient is nature's richest source of alpha-linolenic (ALA) omega-3, an essential fatty acid. ALA also provides the primary nutrients calcium and potassium.

TELL YOUR FRIENDS

We have Jake's Cuisine lovers in most parts of Louisiana, as well as Mississippi and Alabama. Florida too, but that's family. If you have friends who may want their pet to enjoy the only certified human grade, turkey-base food with totally organic ingredients, please tell them Jake's story. They can contact me at jakescuisine@bellsouth.net

Thank you,
Mary Sullivan
Jake's Cuisine

Sheba

Spike

WELCOME

Don't they look happy! **Sheba** and **Spike** have just joined the Jake's Cuisine family; and in a recent letter Ramona, the nice lady that lives with Spike and Sheba, told us about their medical problems. She finished the letter with "the first time we fed Jake's Cuisine to them there was no hesitation; they loved it from day one".

Luke is a seven-month-old Chihuahua who has to come all the way from Livingston Parish for his Jake's Cuisine. June and David live with Luke and take him on long bike rides in the country. Sounds nice doesn't it?
